

41 *Amelanchier utahensis* Shrubland
Utah Serviceberry Shrubland

Association:

-*Amelanchier utahensis* Shrubland

Common species:

Amelanchier utahensis
Artemisia tridentata

Project Specifics:

Frequency = 86 total polygons
75 polygons ZION, 11 polygons Environs
Area = 593 total acres
462 acres ZION, 132 acres Environs
Average Size = 7 acres

Photo Signature Example

Description:

Pure Utah serviceberry stands were relatively rare at ZION even though the species was a common component in many other shrubland map classes. Typically this type occurred on the slopes of volcanic cinder cones and on cinder fields appearing as regular spaced gray dots. Other tall shrubland map classes, especially the Mixed Mountain Shrubland Complex may have been confused with this type where they intermix.
